

The M²erlin just got smarter

M²erlinInfo allows you to smart manage your farm.

From a complete farm summary to individual cow visits, real time data allows you to monitor your M²erlin performance from anytime, anywhere.

You, the farmer and your herd are at the heart of everything we do so we have developed one simple app to help you make smart decisions every day.

#justgotsmarter

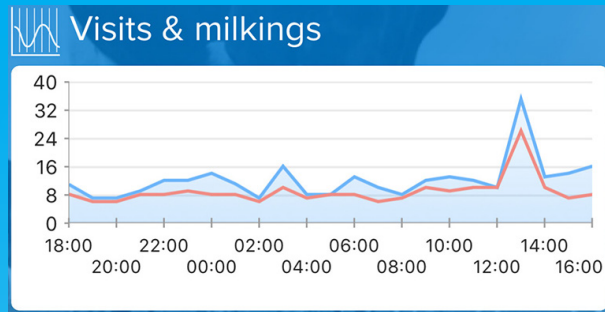

Smart milking and cooling solutions

M²measure your productivity

See the performance of your herd, compare your farm productivity from the last 10 days to a 24 hour average and evaluate your output.

The result is optimised performance and maximised milk yield for you, the farmer.

M²onitor your efficiency

Real time data allows you to check the functionality of your M²erlin based on important indicators.

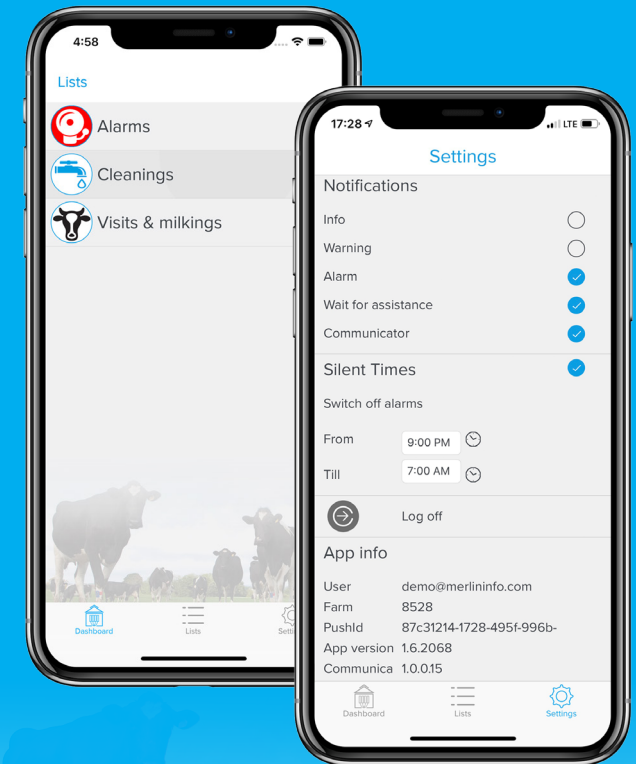

Providing you with a wealth of information about your machine data, production and livestock at your fingertips.

M²aximise your work-life balance

Be notified about the things you care about, check preventive M²erlin maintenance and ensure maximum efficiency anytime, anywhere.

These alarm systems enable you to make fast, smart farming decisions.

Key Features

- ✓ Clear and clean interface provides a user friendly presentation of data
- ✓ Dashboard provides a farm summary of 24 hour production and performance of the herd
- ✓ Real time data includes deviations of attachment timings and milk captured in the first two minutes of milking
- ✓ 3 lists provide an overview of alarms, cleaning and individual visits and milkings

Farmer Benefits

- ✓ Ability to easily and accurately monitor **M²erlin** functionality and efficiency
- ✓ Deviations compare a 10 day average to a 24 hour average to measure productivity
- ✓ Fully customised notifications and alarm systems to make smart management decisions
- ✓ Visit and milking lists monitor real time efficiency and provide valuable livestock information
- ✓ Remote monitoring of the **M²erlin** from your smartphone

This app is designed for the **M²erlin** robot and requires the **M²erlin** communicator installed at your farm.
